Summary

2nd-year B.Tech CSE student skilled in **C++**, **Python**, **Machine Learning**, and **SQL**. Built real-world projects involving **Flask deployment**, **TF-IDF + BM25 retrieval**, and **Random Forest models**. Strong foundation in **DSA and OOP**

Education

IIIT Sector 62, Noida, UP

July 2024 – July 2028 (Expected)

Bachelor of Technology (B.Tech) | Major: Computer Science

CGPA: 7.6/10.0

Relevant Coursework: Data Structures & Algorithms, OOP in C++, DBMS, Operating Systems, Machine Learning Basics

Technical Skills

- **Programming Languages:** C++, Python, SQL, Java, Unix/Linux
- **Libraries/Frameworks:** Pandas, NumPy, Scikit-Learn, Matplotlib, Flask
- **Data & Analytics:** EDA, feature engineering, data cleaning, preprocessing, visualization
- **Machine Learning:** Classification, Regression, Clustering, Model Evaluation (MAE, R^2 , Accuracy)
- **Core CS:** Data Structures & Algorithms (DSA), OOP
- **Tools:** Jupyter Notebook, Git/GitHub, Google Colab

Projects

MANN-O-METER

Nov 2025 – Dec 2025

Machine Learning + Flask Project

- Built an AI-based mental health support system using **Flask**, integrating a chatbot with ML-based stress prediction.
- Implemented an information retrieval chatbot using **TF-IDF + BM25** to answer mental health FAQ queries.
- Developed a stress analyzer using **RandomForestRegressor** and **RandomForestClassifier** for regression and classification.
- Performed feature engineering including **gender encoding**, **blood pressure parsing**, and derived health metric creation.
- Evaluated model performance using **MAE**, **R^2** , **Accuracy**, **Confusion Matrix**, **Classification Report**.
- Repository: [GitHub](#)

Railway Reservation System

2025

C++ Console-Based Project

- Developed a console-based railway reservation system in **C++** to simulate ticket booking and passenger record handling.
- Implemented core functionalities including **train selection**, **seat booking**, and **ticket generation**.
- Structured the solution with modular functions and proper input validation for smooth execution flow.
- Repository: [GitHub](#)

Gym Management System

2025

C++ / OOP Project

- Developed a gym management system using **C++ OOP** for handling member details and gym workflows.
- Designed class-based structure for storing user information and basic membership operations.
- Practiced **OOP principles** including classes, objects, functions, and basic file handling concepts.
- Repository: [GitHub](#)

Certifications

- **Deep Learning (IIT Delhi)** (Online Certification)

Achievements & Leadership

- Solved **167+ C++ problems on LeetCode**, strengthening problem-solving skills and DSA fundamentals.
- Attended a workshop on **RAG (Retrieval-Augmented Generation)** and **LLMs** conducted at **IIIT**.
